Amend claims 1, 3-5, 8 and 16

---

1.(Twice Amended) An aqueous agrochemical concentrate formulation comprising

- 
- a) an agrochemical electrolyte,
  - b) a water-insoluble agrochemical system,
  - c) an alkylglycoside, and
  - d) a co-surfactant which interacts with the alkylglycoside to form a structured aqueous system

wherein the co-surfactant (d) is

- i) a linear or branched chain aliphatic or aromatic alcohol or
  - ii) an alcohol or ester or alkyl phenol alkoxylate which is an alkoxylated C<sub>8</sub> - C<sub>22</sub> alcohol, an alkoxylated C<sub>8</sub> - C<sub>22</sub> alkyl phenol or an alkoxylated C<sub>8</sub> - C<sub>22</sub> carboxylic acid each containing from 1-3 alkoxy groups
- or
- iii) a glyceryl alkyl or alkenyl ester.
- 

3.(Twice Amended) The formulation according to claim 1 wherein:

the linear or branched chain alcohol (i) is a primary or secondary, linear or branched alkyl or alkenyl alcohol containing from 5 to 20 carbon atoms or is an alkyl- or alkenyl-substituted aromatic alcohol containing from 5 to 20 linear or branched alkyl carbon atoms; or

wherein the alcohol or ester or alkyl phenol alkoxylate (ii) is an alkoxylated C<sub>8</sub>-C<sub>22</sub> primary or secondary, linear or branched chain alcohol, an alkoxylated C<sub>8</sub>-C<sub>22</sub> alkyl phenol or an alkoxylated C<sub>8</sub>-C<sub>22</sub> carboxylic acid each containing from 1-3 C<sub>2</sub>-C<sub>4</sub> alkoxy groups; or

wherein the glyceryl alkyl or alkenyl ester (iii) is a monoester of a C<sub>8</sub>-C<sub>22</sub> carboxylic acid with glycerol.

B2  
Central

4.(Twice Amended) The formulation according to claim 3, wherein the co-surfactant comprises at least one member selected from the group consisting of pentanol, hexanol, octanol, octan-2-ol, decanol and their branched chain or mixture of branched chain equivalents, oleyl alcohol, 2-ethyl-1-hexanol, an ethoxylated lauryl alcohol having a mean ethylene oxide content of 2, an ethoxylated octyl phenol having a mean degree of ethoxylation of 3, and glyceryl monolaurate.

5.(Twice Amended) The formulation according to claim 1, wherein the agrochemical electrolyte comprises at least one member selected from the group consisting of salts of glyphosate, fomesafen, glufosinate, paraquat and bentazone or is ammonium sulphate.

B3

8.(Twice Amended) The formulation according to claim 7, wherein the water-insoluble herbicide comprises at least one member selected from the group consisting of diuron, linuron, sulfometuron, chlorsulphuron, metsulfuron, chlorimuron, atrazine and simazine.

B4

16.(Twice Amended) A process for the preparation of the formulation according to claim 1 which comprises bringing into admixture an aqueous dispersion of

- a) an agrochemical electrolyte,
- b) a water-insoluble agrochemical system,
- c) an alkylglycoside, and
- e) optionally an ionic surfactant,

and thereafter adding

d) a co-surfactant which interacts with the alkylglycoside to form a structured aqueous system

wherein the co-surfactant (d) is

- i) a linear or branched chain aliphatic or aromatic alcohol or
  - ii) an alcohol or ester or alkyl phenol alkoxyate which is an alkoxyated C<sub>8</sub> - C<sub>22</sub> alcohol, an alkoxyated C<sub>8</sub> - C<sub>22</sub> alkyl phenol or an alkoxyated C<sub>8</sub> - C<sub>22</sub> carboxylic acid each containing from 1-3 alkoxy groups
- or
- iii) a glyceryl alkyl or alkenyl ester.
